Five years of hands-on development experience within the Front-End. Focusing on a role in JavaScript or Typescript. Strong collaboration skills, along with the ability to support a team's ever-changing needs gained from years as a consultant and contractor.

SKILLS:

- React
- JavaScript
- HTML
- CSS
- Angular
- Typescript
- Unit testing
- Agile
- Node.js
- Redux
- Jest
- Next.js

WORK EXPERIENCE:

Idexx — November 2023 to December 2024

Idexx is a global leader in pet healthcare innovation with a wide variety of products to help veterinarians work with pets and manage information in their practice.

Application Developer
I worked as a contractor for Idexx through Dexian to produce features for an internal app. I was part of a team of Idexx employees and worked with that team to finalize requirements for the app and participated in scrum and other agile processes as part of that team.

- Built on an existing React and Next.js framework using Typescript and Tailwind.css
- Styled multiple web pages using an internal design system with a component library
- Cooperated with the QA team to find and fix bugs
- Incorporated existing api calls with the new app
- Used Next.js server components to handle log out logic
- Communicated with users of the app to learn about their experience to

Rightpoint Consulting — September 2019 to March 2023

Rightpoint, a Genpact company, is a global total experience leader working to create seamless digital experiences driven by data, insights, strategy, technology, and design.

Front-End Developer
I worked directly with various clients across multiple projects. I collaborated with developers, designers and stakeholders' teams to craft a solution from kick-off to delivery. Clients ranged from large-scale retail chains, global airlines as well as major financial institutions. All engagements were built within the Agile methodology.

- Member of project teams tasked with creating and maintaining components using React and Angular
- Worked closely with designers, and created components using precise Figma measurements
- Wrote tests to meet a client's project wide 80% testing requirements
- Built responsive web pages for mobile and cross browser functionality
- Voiced concern and worked between teams to resolve problems before the component's release
- Took responsibility for the initial setup of a project and the smooth onboarding of new devs to the team.

EDUCATION:

Rochester Institute of Technology (RIT) | Rochester, NY
Bachelor's in Game Design and Development
